MOTORTECH Extended Barrel Spark Plugs

For JINAN[®] and SHENGLI[®] Gas Engines

For JINAN[®] V16 and SHENGLI[®] V16 and V20 gas engines, MOTORTECH offers a special spark plug based on its XTL-Plug design. Manufactured with an integrated spark plug lead, the XTL-Plug allows a direct connection to an externally mounted ignition coil and use of diagnostic tools like a high voltage clamp or Scope Meter.

The J-type electrode design with IRIDIUM alloy discs on center and ground electrode provides reliable combustion and increased spark plug life and helps to reduce service costs due to less spark plug changes. The M18x1.5 thread with an extended reach of 25.4 mm perfectly fits the application.

Next to the mentioned features, MOTORTECH's XTL and XT-PLUG design eliminates several of the known problems of products made by competitors.

- A** Integrated 7 mm spark plug lead for a direct connection to an ignition coil
- B** 15 in. extended barrel length
- C** Integrated stress resistant resistor¹⁾ suppresses electromagnetic interference (EMI)
- D** M18x1.5 thread size with long 25.4 mm reach
- E** J-type design with copper cored center and ground electrode with laser welded IRIDIUM alloy discs

Features

- No more trapped air in the extension barrel
- No more condensation
- No internal flash over
- High dielectric strength
- Rigid welds
